

**COM 33400 Web Design – Week 7 Assignment – Media Design Firm Website Micro Project**  
**Phase 1 DUE 10/15/15**

This Micro Project will be to create a design agency website using Bootstrap as the framework. Use the following URL to see an example <https://www.gaslampmedia.com/>

Produce the following items for next week's class:

1. A detailed website Wireframe. I'd like to see mockup graphics and placeholder text used in these.
2. Your site must use at least 4 unique layouts in the site.
3. You must have at least one page with each of the following structures: 2 column structure, 3 column structure and 4 column structure.
4. A website sitemap (flowchart) showing how pages link together.
5. A basic mockup of your site using bootstrap / filler images and filler text.
6. 5 color palette

I will be providing the text and images you will need to integrate into the final site next week. Work on creating a basic rapid prototype this week. Additional requirements for the site will be added in next week's class.

**When complete, upload your files to both the Google Drive >Week 7 folder and to a subdomain on your Biz.nf website.**
