

COM 33400 Web Design – Week 3 Assignment – Due MONDAY 9/14/15

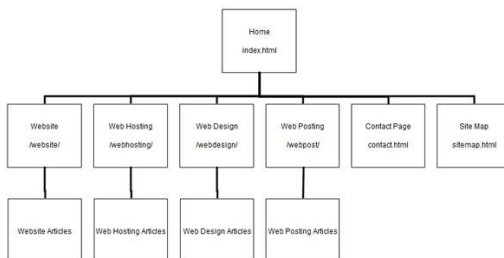

Your third assignment is to create a website for “Tech News”. This website is meant to host a variety of content about tech gadgets, online tech, etc. Your objective is to create a rapid prototype for the site **using the Toast Framework**. The site must have a minimum of 3 pages.

Steps:

1. Create a website wireframe for each unique page layout. (example below):

2. Create a website sitemap(example Below):

3. Use the Toast Framework to develop a mockup of the site. The images and text can be filler images and text at this point. Download the Toast framework from the “Resources>Week 3” Folder on Google Drive, or this website:
<https://daneden.github.io/Toast/>
4. When complete with the mockup, upload your file folder into the Google Drive in your folder. Be sure to create a “Week 3” sub-folder to upload the files into. If your drive is not organized by weeks, I will not grade the assignments.
